■ Precautions

	1	This product uses ordinary off-the-shelf electronic components,
$\mathbf{\mathbf{\hat{\mathbf{N}}}}$		and is therefore inappropriate for use in applications that require
		special quality or reliability and are expected to protect human
		lives or prevent accidents, such as safety mechanisms in fields
Do Not		including space, aeronautics, medicine, and nuclear power.
	2	Do not be used underwater or in high-humidity environments.
	3	Do not be used in the presence of corrosive gases, combustible
		gases, or other flammable gases.
	4	Do not turn on power when circuit board surface is in contact
		with other metal.
	5	Do not apply voltage higher than rated voltage.
	•	

	6	This manual may be revised in the future without notice owing
		to improvements.
	7	All efforts have been made to produce the best manual possible,
Attention		but if users notice an error or other problem, we ask that they
Attention		notify us.
	8	Item 7 notwithstanding, HuMANDATA cannot be held liable for
		the consequences arising from use of this product.
	9	HuMANDATA cannot be held liable for consequences arising
		from using this product in a way different from the uses
		described herein, or from uses not shown herein.
	10	This manual, circuit diagrams, sample circuits, and other content
		may not be copied, reproduced, or distributed without
		permission.
	11	If the product emits smoke, catches fire, or becomes unusually
		hot, cut the power immediately.
	12	Do not install the control cables or communication cables
		together with the main circuit lines or power cables. In such an
		environment, it may result in malfunction due to noise.
	13	Be careful of static electricity.

Jan. 23, 2019	v1.0	Initial release	
Feb. 20, 2025	v1.1	Update: 4.2. Optional Accessories	

Introduction

Thank you very much for purchasing our product LPT-CAPTURE-LAN, LNX-201. LNX-201 is a parallel signal converter which make it possible to capture parallel signal from a general printer interface via LAN.

1. Product Configuration

The following lists the product configuration of the LNX-201.

LPT-CAPTURE-LAN (LNX-201)	1
microSD card with USB adapter	1
AC adapter (DC5V)	1
Driver & Application CD	1

2. Product Summary

LNX-201 can capture print data to your computer from a distant device which has printer interface. For example, LNX-201 can convert HPGL output from an oscilloscope or a measuring instrument to the image file, such as a JPEG format. Please note that LNX-201 does not support parallel output. It is only support parallel input. Any application for capture is not bundled.

LNX-201 supports PoE. That makes it possible to be powered via a LAN cable (PoE compatible HUB or other is required). It can also be powered by the AC adapter. Network setting can be saved to and restored from a microSD card. Restoring the setting information from a microSD card is very convenient when replacing LNX-201.

3. Overview

3.1. Front Side

LEDs

	Name (color)	Function	
POW	Power LED (red)	Turn on during the power is supplied.	
SYS	System LED (red)	Blink few seconds during reading process. Turn on when system is ready.	
LAN	LAN side Status LED (red)	Turn on when there is output data to LAN side.	
LPT	Centronics side Status LED (red)	Turn on when there is input data from Centronics side	
microSD	microSD card access LED (red)	Turn on during accessing microSD card. When it turned off, you can extract the card.	

3.2. Rear Side

LAN side and Centronics side is isolated.

	Name (color)	Function	
ACT	Active LED (green)	Turn on during network port communication.	
LINK	Link LED (yellow)	Turn on when the power is supplied and LAN cable is connected normally.	

4. Specifications

Item Description		Remarks
Model	LNX-201	
Dowon	5VDC, Supplied by AC adapter	PoE function supports
Power	or LAN connector (PoE function)	both mode A and B
Current Consumption	Less than 500mA	
	IEEE802.3 (10Base-T)	
Network Interface	IEEE802.3u (100Base-TX)	
	half-duplex / full-duplex (auto detected)	
	D.1.2	ESD protection ±11KV
LAN Connector	RJ45	isolation over 1500Vrms
Protocol	TCP / UDP / Telnet	
Parallel Input	Centronics Parallel input	TTL
	Centronics type 36pin	
Parallel side Connector	Amphenol connector (female)	
		For save and restore the
Setting Memory Card	microSD card	product setting
	POW: Power LED	
	LPT: Centronics side Status LED	
	LAN: LAN side LED	
	SYS: System Status LED	
	LINK (RJ45 Connector): LINK Status	
	ACT (RJ45 Connector): ACT Status	
Operating Ambient Temp. -10 to 55 [°C] (14 to 131 [°F])		
Operating Ambient Humi.	30 to 85 %RH	No condensation
Storage Ambient Tem.	-20 to 60 [°C] (-4 to 140 [°F])	permitted
Storage Ambient Humi.	30 to 85 % RH	
Weight	Approx. 270 [g]	Only main body
Dimensions	165 x 80.5 x 39 [mm]	Without projections
Dimensions	(6.496" x 3.169" x 1.535")	without projections

* There may be cases that these parts and specifications are changed.

* Power saving function (suspend, standby, sleep and others) is not supported

* Please use the microSD card included in the package. SDHC/SDXC is not supported

Item Description		Remarks	
Output	5VDC 2.0A		
Plug	2.1mm inner diameter	Positive Tip	
Compatible DC Jack	2.1mm inner diameter		
Operating Ambient Temp.	0 to 40 [°C] (32 to 104 [°F])		
Operating Ambient Humi.	30 to 85 % RH		
Storage Ambient Temp.	-20 to 80 [°C] (-4 to 176 [°F])	No condensation permitted	
Storage Ambient Humi.	10 to 95 % RH		
Wire Length	1.6m		
Weight	approx. 70 [g]		
Dimonsions	46 x 34 x 25 [mm]	Without projections	
DIIIICIISIOIIS	1.811" x 1.339" x 0.984"		

4.1. AC adapter (Japan's specifications)

* This AC adapter is attached for use mainly in Japan. If you use in the other countries, please check the specifications above and plug shape. There may be cases that this part and specifications are changed.

*

Model Name	Image	Description	
ACC-027	J.	Attachment for vertical direction JAN: 4937920801096	
ACC-028	D28 Attachment for horizontal direction JAN: 4937920801102		
ACC-031		Attachment for DIN rail type B JAN: 4937920801256	
ACC-036		Neodymium magnet set JAN: 4937920801539	

4.2. Optional Accessories

4.3. Power Supply

LNX-201 supports PoE function both A and B type as standard which make it possible to be powered via a LAN cable (PoE compatible HUB is required). It also can be powered by the AC adapter.

5. Connection examples

[LNX-201 single operation]

Capture parallel signal from devices which have general printer interface via a local area network.

[Tunneling mode between LNX-201 and LNX-001]

Capture parallel signal by USB interface from devices which have general printer interface via a local area network. For communication, FTDI virtual COM port and D2XX-API can be used. No need knowledge of network for the programming. LNX-001 is a USB to LAN converter.

[Direct print via LNX-201]

Print Centronics input data directly by relaying the data to LAN printer. To print properly, the input data should be suitable for the printer.

* Please use a cross cable to connect LNX-201 without using a hub. (LNX-201 does not have a function for AutoMDI/MDI-X.)

6. Setting Tool

LNX SETTING TOOL supports saving and reading network settings from microSD card, or you can also configure the setting over the network. This tool does not require any installation. The application can be downloaded from the CD comes with the product or from our website.

This chapter covers how to read and write the basic setting. For more details, please refer to LNX SETTING TOOL User's Manual in the CD.

This is a screenshot from version 3.5

6.1. Access Flow of microSD card

6.2. Write Setting Data

- 1. Open Setting Tool for LNX series (LNX SETTING TOOL Ver*.*).
- 2. Select "LNX-201 LPT-CAPTURE-LAN", and click "OK".

Product select	×
Please select the product, and push the OK button. LNX-201 LPT-CAPTURE-LAN	

- 3. Enter the setting such as network or serial.
- 4. Insert a microSD card to PC (A USB adapter is included with the product)
- 5. Click "Saving data".

H ^U LNX SETTING TOOL		– 🗆 🗙

Product : LNX-201 LPT-CAPTURE-LAN		

6. Click "OK" in the confirmation dialog.

- 7. Specify the microSD card as saving destination. Please do not change the file name from "WR_DATA.TXT".
- 8. Remove the microSD card from PC and insert it to the product. Please confirm that the product power is turned off.
- 9. When the product is powered on, the setting data is configured to the product automatically. After the data is stored in the product, microSD card is not needed any more. The start-up time can be shortened if the microSD card is removed from the product.

Please be careful not to detach the microSD card before microSD LED is turned off.

6.3. Read Setting Data

- 1. After confirming the power is off, insert the microSD card to the product.
- 2. When the product is powered on, the setting data will be reserved to the microSD card automatically. The data file name is "RD_DATA.TXT".

Please be careful not to detach the microSD card before microSD LED is turned off.

* If there is the same file name in the microSD card, the data will be overwritten.

- 3. Insert a microSD card to PC (A USB adapter is included with the product)
- 4. Start the setting tool and click "Reading data".

192.168.0.101	Remote IP Address	192.168.0.100
10005	Remote Port Number	10005
Serial Communication		
921600	Baud rate	230400
RTS/CTS (hard ware)	Flow Control	RTS/CTS (hard ware)
1	Stop Bits	1
None	Parity	None
8	Data Bits	8

* Serial setting of LNX-201 is fixed.

Network Setting	
IP Address	192.168.0.100
Subnet Mask	255.255.255.0
Default Gateway	0.0.0.0
Port Number	10005
Protocol	ТСР
Remote IP Address	192.168.0.101
Remote Port Number	9100

7. Virtual COM Port

You can use the software that creates Virtual COM ports on your PC. You can use the COM port to communicate to an IP address of LNX-201. Rather than going out the local port, the data is transmitted across the Ethernet network using TCP/IP. LNX-201 attached to the network receives the data and transfers it from its own serial port to the attached equipment.

For more details about the application, please refer to the "CPR_Manager" folder in the CD-ROM bundled with the product. There is the download link for the application in that folder.

8. Additional Documentation and User Support

The following documents and other supports are available at https://www.hdl.co.jp/en/faspc/LNX/lnx-201

- LNX SETTING TOOL
- Outline Drawing... and more.
